The WinPower Program cannot guarantee savings compared to Eversource Basic Service for the duration of the Program pricing because future Basic Service rates are unknown.

Program prices could also increase as a result of a change in law that results in a direct material increase in costs during the term of the electric supply contract. Program prices include a commission fee of \$0.001/kWh for the aggregation consultant. Program prices also include taxes which are billed as part of the power supply charge.

WinPower prices apply to service beginning and ending on the days of the month that your meter is read. Rates indicated above are for Supply Services only.

Some products contain additional Renewable Energy Certificates (RECs) above that required by MA law. The additional RECs qualify for MA Class I designation from generation located within, or delivered to, New England.
